Profile

A highly motivated and detail-oriented web developer with a strong foundation in PHP, Laravel, and React.js, seeking an opportunity to contribute to a dynamic organization that fosters professional growth and innovation. I aim to work in a challenging environment where I can apply my technical skills, problem-solving abilities, and creative thinking to deliver impactful web solutions. With hands-on experience in developing and maintaining e-commerce platforms, educational portals, travel websites, and custom systems like attendance management and recruitment portals, I bring both versatility and reliability to my role.

Experience

WEB DEVELOPER | KARV DIGITAL MEDIA AND EVENT SOLUTIONS | JANUARY 2025 – PRESENT

- Developed and maintained web applications using **PHP (Core & Laravel)** and **React.js**, ensuring responsive and high-performance websites.
- Executed full-stack **backend development**, including **API integration**, **MySQL database management**, and server-side logic.
- Built and deployed websites across various domains including:
 - **E-commerce website** with secure payment integration and inventory management.
 - **Educational portal** with dynamic content modules and user dashboards.
 - **Travel and tourism website** with booking engines and itinerary displays.
- Created a feature-rich **Recruitment Portal** in PHP with job listings, resume submissions, filtering, and admin control.
- Designed and implemented a custom **Attendance Management System** using PHP and MySQL, enabling accurate tracking and reporting.
- Developed **Madhavbaug Informative Website**, a healthcare portal aimed at educating users about **heart and diabetes care**, including responsive UI and content-rich architecture.

JR. DEVELOPER | HETFY SOFTWARE SOLUTIONS LLP | JUNE 2024 – JANUARY 2025

- Maintaining and debugging the company's **PHP-based website**, ensuring smooth functionality and optimal performance.
- Working on Hetfy's **in-house e-commerce platform**, resolving issues related to **product listings**, user experience, and backend logic.
- Listed and managed products on **UK-based e-commerce platforms**, ensuring accurate data sync and pricing.
- Actively involved in fixing bugs and supporting integrations with third-party tools such as **Linnworks** and **EFM**, both developed in **PHP**.
- Collaborated with cross-functional teams to ensure product data consistency and improve platform stability.

JR. DEVELOPER | CLOUD EXIS TECHNO LABS | OCTOBER 2022 – JUNE 2024

- Completed 6-month internship building **E-Commerce websites** using **Core PHP** in a local development environment.
- Promoted to full-time position and worked on **Laravel-based web applications** and **admin panels**.
- Built a complete **E-Commerce admin panel** using **Laravel**, handling products, orders, users, and reports.
- Implemented **API integration** between **ShipOne** and **SageOne** using **cURL** for shipping and accounting synchronization.
- Gained proficiency in **ReactJS** and contributed to a **live Real Estate project** with **ReactJS (frontend)** and **Laravel (backend)** architecture.
- Worked in **Agile development environment**, collaborating with designers, testers, and senior developers.
- Experience with **version control (Git)**, **RESTful APIs**, and **cross-browser frontend development**.

Projects

COCO UNICORN

- Developed and maintained the **admin panel** for the COCO UNICORN project using **Laravel**.
- Integrated backend features including **product management**, **order tracking**, and **user role management**.
- Designed and managed the **invoice module and database structure** for accurate billing and record-keeping.

ARTMIDAS

- Built and maintained the **Artmidas E-Commerce website** using **Laravel**, focused on selling wallpapers online.
- Developed key modules including **product listing**, **shopping cart**, **checkout process**, and **order management**.
- Ensured smooth admin operations by building a user-friendly **backend panel** for managing products, categories, and orders.

SHIP TO SAGE API INTEGRATION

- Implemented **ShipOne to SageOne API integration** using **PHP cURL** for seamless data transfer.
- Automated the process of sending **shipping and order data** from ShipOne to SageOne accounting system.

IPLAN MALAYSIA

- Worked on **Iplan Malaysia**, a web application built with **ReactJS (frontend)** and **Laravel with Vite (backend)**.
- Contributed to various **frontend and backend modules**, including **UI development**, **API integration**, and **data handling**.
- Ensured **performance optimization**, **responsive design**, and smooth **frontend-backend communication**.

- **PRANIL EDUCATION SERVICES LLP**

- Developed both **frontend and backend** of the **Pranil Education Services** website using **Core PHP**.
- Built features to manage **student inquiries, course details, and application processes** for immigration services.
- Created a user-friendly **admin panel** for content and data management, improving operational efficiency.

Education

BACHELOR'S IN INFORMATION TECHNOLOGY | 2020-2023 | SILVER OAK UNIVERSITY, AHMEDABAD

DIPLOMA IN INFORMATION TECHNOLOGY | 2017-2020 | GOVERNMENT POLYTECHNIC GANDHINAGAR

SSC GUJARAT BOARD | 2016-2017 | RAJ MADHAV VIDYA VIHAR, AHMEDABAD

Skills & Abilities

- **Programming Languages:**
PHP, JavaScript, HTML5, CSS3, SQL
- **Frameworks & Libraries:**
Laravel, ReactJS, Bootstrap, jQuery Excellent
- **Web Development:**
Full Stack Development, RESTful API Integration, Admin Panel Development, E-Commerce Systems, CMS Customization
- **Database Management:**
MySQL – Database Design, Query Optimization.
- **Tools & Technologies:**
cURL, Git, Vite, XAMPP, VS Code, Postman.
- **Soft Skills:**
Team Collaboration, Problem Solving, Time Management, Debugging & Troubleshooting

Activities and Interests

Art, Travel, Web Development
